#### 文档中尚不明确的地方

- 1. 集群事件展示哪些内容,使用哪个API Server接口
- 2. nodepool 中的操作系统,状态 字段含义

本文档由 Rap2 (https://github.com/thx/rap2-delos) 生成

\*本项目仓库: http://rap2.taobao.org/repository/editor?id=290341 \*

# openyurt\_frontend (前端访问后端接口)

模块: Cluster

接口:集群状态综述

- 地址: /clusterOverview
- 类型: GET
- 状态码: 200
- 简介: "集群信息"界面
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476785&itf=2076198
- 请求接口格式:
- └ namespace: String (账户对应namespace)
- 返回接口格式:
- └ clusterStatus: Array
  - ├ kind: String (资源类型)
  - ├ totalNum: Number (资源总量)
  - └ healthyNum: Number (正常资源数量)

# 接口:集群事件(含义不明确)

- 地址: /clusterEvents
- 类型: GET
- 状态码: 200
- 简介: 功能待定
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476785&itf=2077065
- 请求接口格式:
- 返回接口格式:

模块: User

#### 接口: 注册

- 地址: /register
- 类型: POST
- 状态码: 200
- 简介: 创建用户CR (用时可能较长)
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476786&itf=2076199
- 请求接口格式:

├─ email: String ├─ phone: String

└ organization: String

• 返回接口格式:

└ token: String

#### 接口: 登录

- 地址: /login
- 类型: GET
- 状态码: 200
- 简介: 获取用户CR, 并校验token
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476786&itf=2076575
- 请求接口格式:
- ├─ email: String (用户输入邮箱)
- └ token: String (用户注册获取的token)
- 返回接口格式:
- ⊢ spec: Object
- | ├ kubeConfig: String (连接集群的kubeConfig)
- | ├ nodeAddScript: String (节点加入集群脚本)
- | ├ validPeriod: Number (账户有效期)
- | ├─ maxNodeNum: Number (账户最大拥有节点数)
- └ status: Object
  - ├ nodeNum: Number (账户已加入节点数)
  - ├ effectiveTime: String (账户生效时间)
  - └ expired: Boolean (账户是否过期)

# 模块: Node

## 接口: 展示所有节点

- 地址: /nodes
- 类型: GET
- 状态码: 200
- 简介: Node 界面
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476787&itf=2076200
- 请求接口格式:

└ token: String (用户身份token)

• 返回接口格式:

```
├ allNodes: Array (节点列表)
│ ├─ name: String (node名称)
├ uid: String (node实例ID)
 ├ ip: String (node IP地址)
 ├ nodePool: String (node所属节点池)
 ├ role: String (node角色)
 ├ status: String (node状态(通过conditions字段得到))

    ⊢ nodeInfo: Object

    ─ containerRuntimeVersion: String

 │ └ atchitecture: String
 ⊢ nodeStatus: Object
| ├─ cpu: String (CPU 请求 限制 使用量)
 | └ memory: String (内存 请求 限制 使用量)
 ├─ configuration: String (node 配置)
└ containerGroup: String (容器组(预留字段,暂不支持))
└ createTime: String (创建时间)
```

# 接口:展示所有节点池

• 地址: /nodepools

• 类型: GET

• 状态码: 200

• 简介: NodePool 界面

• Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476787&itf=2077149

• 请求接口格式:

└─ token: String (用户身份token)

• 返回接口格式:

```
□ items: Array
□ name: String (名称)
□ type: String (类型)
□ nodeStatus: Object (节点信息)
□ totalNum: Number
□ healthyNum: Number
□ createTime: String (创建时间)
□ status: String (节点池状态 (含义不明确))
□ os: String (操作系统(含义不明确))
```

#### 模块: Workload

# 接口:展示所有deployments

• 地址: /deployments

● 类型: GET

• 状态码: 200

• 简介: 用于工作负载-无状态界面

• Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476936&itf=2076991

• 请求接口格式:

```
├ token: String (用户身份token)
└ namespace: String (账户对应namespace)
```

```
☐ items: Array
☐ name: String (名称)
☐ labels: String (标签)
☐ createTime: String (创建时间)
☐ image: Array (镜像)
☐ image: String
☐ status: Object (容器组数量)
☐ replicas: Number (Total number of non-terminated pods targeted by this deployment (their labels match the selector).)
☐ readyReplicas: Number (Total number of ready pods targeted by this deployment.)
```

#### 接口:展示所有statefulsets

• 地址: /statefulsets

• 类型: **GET** 

• 状态码: 200

• 简介: 用于工作负载-有状态界面

• Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476936&itf=2077216

• 请求接口格式:

├─ token: String (用户身份token)└─ namespace: String (用户对应namespace)

## 接口:展示所有jobs

- 地址: /jobs
- 类型: GET
- 状态码: 200
- 简介: 用于工作负载-任务界面
- Rap地址: http://rap2.taobao.org/repository/editor? id=290341&mod=476936&itf=2077978
- 请求接口格式:

```
├ token: String (用户身份token)
└ namespace: String (用户对应namespace)
```

• 返回接口格式:

```
☐ items: Array
☐ hame: String (Job 名称)
☐ tags: String (标签)
☐ status: String (状态 (由condition 得到))
☐ podStatus: Object
☐ active: Number (The number of actively running pods.)
☐ failed: Number (The number of pods which reached phase

Failed.)
☐ succeeded: Number (The number of pods which reached phase

Succeeded.)
☐ images: Array (镜像)
☐ image: String
☐ startTime: String (创建时间)
☐ completionTime: String (完成时间)
```

openyurt\_backend (后端访问API Server接口)

## 模块: build-in resource

#### 接口: list deployments

- 地址: /apis/apps/v1/namespaces/{namespace}/deployments
- 类型: GET状态码: 200
- 简介: Cluster Overview界面、workload详情界面
- Rap地址: http://rap2.taobao.org/repository/editor? id=290344&mod=476802&itf=2076264
- 请求接口格式:

```
└ namespace: String (账户对应namespace)
```

```
⊢ kind: String
⊢ apiversion: String
├─ metadata: Object : Object
└ items: Array
  ⊢ kind: String
  ⊢ apiversion: String
  ⊢ metadata: Object

⊢ selfLink: String

   ⊢ uid: String

    ⊢ resourceVersion: String

    ⊢ generation: Number
    ⊢ creationTimestamp: String
     ├ labels: Object
    | └ run: String
     └ annotations: Object
       ─ deployment.kubernetes.io/revision: String

    □ replicatingperfection.net/push-image: String

  ⊢ spec: Object
    ⊢ replicas: Number
     ⊢ selector: Object
     └ run: String
     ⊢ template: Object
```

```
    ─ metadata: Object

      ⊢ creationTimestamp: Null
      └ labels: Object
       └ run: String
    └ spec: Object
      ⊢ containers: Array
      ⊢ restartPolicy: String

    ⊢ dnsPolicy: String

      └─ securityContext: Object : Object
  └ strategy: Object
    ⊢ type: String
    └ rollingUpdate: Object
      ⊢ maxUnavailable: Number
      └ maxSurge: Number
└ status: Object

    ─ observedGeneration: Number

  ⊢ replicas: Number
  ─ updatedReplicas: Number

    ─ availableReplicas: Number

  └─ readyReplicas: Number
```

# 接口: list jobs

- 地址: /apis/batch/v1/namespaces/{namespace}/jobs
- 类型: GET
- 状态码: 200
- 简介: Cluster Overview界面、workload详情界面
- Rap地址: http://rap2.taobao.org/repository/editor? id=290344&mod=476802&itf=2076268
- 请求接口格式:

```
└─ namespace: String
```

```
⊢ kind: String
⊢ apiversion: String
⊢ metadata: Object
└ resourceVersion: String
└ items: Array
 ⊢ metadata: Object
 ⊢ namespace: String

⊢ selfLink: String

  ⊢ uid: String
 │ └─ creationTimestamp: String
 ⊢ spec: Object
  ⊢ parallelism: Number
   ├ completions: Number
   ⊢ selector: Object
   └ controller-uid: String
   └ template: Object
     ⊢ metadata: Object
     | └ labels: Object
        └ job-name: String
     └ spec: Object
       ⊢ containers: Array
       ⊢ restartPolicy: String

    ⊢ dnsPolicy: String

       └─ securityContext: Object : Object
 └ status: Object

    ⊢ startTime: String

   ⊢ active: Number
```

```
    ⊢ completionTime: String
    ⊢ conditions: String (JobCondition array)
    ⊢ failed: Number
    ⊢ succeeded: Number
```

## 接口: list nodes

• 地址: /api/v1/nodes

类型: GET状态码: 200

• 简介: Cluster Overview界面、Node展示界面

• Rap地址: http://rap2.taobao.org/repository/editor? id=290344&mod=476802&itf=2076270

• 请求接口格式:

```
⊢ kind: String
⊢ apiversion: String
⊢ metadata: Object

⊢ selfLink: String

 └─ resourceVersion: String
└ items: Array
  ⊢ metadata: Object
   ⊢ name: String
